

# RITE NOW @ ROP

---

Student Development Week during the month of May for Sycamore Canyon Academy was full of fun activities. Daily events were coordinated by the Education Department. The week started with Mother's Day cards and crafts. Students then showed service by participating in a site beautification day. A fun field day was also held, where students had a friendly competition of donut eating, water trivia and a water balloon toss. To end the week, staff and students had a BBQ where students made their own hot dogs and s'mores. Student Development Week gave the students the opportunity to practice social skills, work together, show service, and create great memories. Sycamore Canyon Academy plans on continuing week long activities for Student Developments' ahead.
