

RITE NOW @ ROP

Students at Sycamore Canyon Academy explore nature through a lens. SCA Intern Status Students take part in our Credited Photography Vocation. Sycamore's remote campus does not only house our students and staff but also a variety of wild animals. Recently we were faced with Flash flooding, and witness a mother Kudamundi taking her 8 babies to safety. Photography gives the student the opportunity to capture memories as well as learn basic photography skills that students can later peruse as a career. Student Athlete Miranda says "I like photography, I get to explore, take pictures of things I've never seen and it's very peaceful". Students also capture photos of our RAM students and put together a slideshow for their Validation ceremony, that families enjoy very much.
